SUBJECT INDEX OF VOLUME 75*

Coupled problems

- Un problème de fréquences propres en couplage fluide-structure, C. Conca, J. Planchard and M. Vanninathan (1-3) 27- 37
- Internal design of the E3D inter-discipline environment, J.P. La Hargue and J.P. Mascarell (1-3) 227-240

Dynamics

- Adaptive remeshing for transient problems, R. Löhner (1-3) 195-214
- Modélisation dynamique littérale, C. Garnier, P. Rideau and Y. Papegay (1-3) 215-225
- Time accurate solutions of the incompressible and three-dimensional Navier-Stokes equations, H.A. Dwyer and S. Ibrani (1-3) 333-341

Electromagnetic fields

- Numerical solution of Maxwell's equations in a conductive and polarizable medium, A. Bamberger, B. Cockburn, Y. Goldman, P. Joly and M. Kern (1-3) 11- 26
- Etude en éléments finis de faisceaux de particules chargées, P. Ravier and J.-P. Penicaud (1-3) 531-542

Electronics

- Numerical simulation of semiconductor devices, F. Brezzi L.D. Marini and P. Pietra (1-3) 493-514

Finite difference methods

- A high order staggered grid method for hyperbolic systems of conservation laws in one space dimension, R. Sanders and A. Weiser (1-3) 91-107
- Considerations for the development of grid schemes for hypersonic flows, D.D. Cline and J.J. Bertin (1-3) 283-297
- Recent improvements in Galkerkkin and upwind Euler solvers and applications to 3-D transonic flow in aircraft design, V. Billey, A. Dervieux, L. Fezoui, J. Periaux, V. Selmin and B. Stoufflet (1-3) 409-414

* The issue number is given in front of the page numbers.

Finite element and matrix methods

- Numerical solution of Maxwell's equations in a conductive and polarizable medium, A. Bamberger, B. Cockburn, Y. Goldman, P. Joly and M. Kern (1-3) 11-26
- Non-conforming spectral element-finite element approximations for partial differential equations, C. Bègue, C. Bernardi, N. Debit, Y. Maday, G.E. Karniadakis, C. Mavriplis and A.T. Patera (1-3) 109-126
- A pseudospectral matrix element method for calculation of double diffusive layers near corners, H.-C. Ku, T.D. Taylor and R.S. Hirsh (1-3) 141-151
- Development of a hierarchical and adaptive finite element software, G. Adjedj and D. Aubry (1-3) 153-165
- Compressible viscous flow simulation by multigrid methods, F. Angrand and P. Leyland (1-3) 167-183
- Multigrid domain decomposition methods for elliptic problems, Y.A. Kuznetsov (1-3) 185-193
- Adaptive remeshing for transient problems, R. Löhner (1-3) 195-214
- Nonlinear thin shell finite element with six degrees of freedom per node, S. Jaamei, F. Frey and P. Jetteur (1-3) 251-266
- High order sensitivity analysis in shape optimization problems, F. Navarrina, E. Bendito and M. Casteleiro (1-3) 267-281
- Iterative methods for the solution of Stokes equations, R. Aboulaich and M. Fortin (1-3) 317-324
- A new finite element method for computing the flow inside rotating machinery, D. Pelletier, A. Garon and R. Camarero (1-3) 343-358
- An improved finite element iterative method for 3-dimensional fluid flow problems, M.P. Robichaud, P.A. Tanguy and M. Fortin (1-3) 359-368
- Recent improvements in Galerkin and upwind Euler solvers and applications to 3-D transonic flow in aircraft design, V. Billey, A. Dervieux, L. Fezoui, J. Periaux, V. Selmin and B. Stoufflet (1-3) 409-414
- A multi-element group preconditioned GMRES algorithm for nonsymmetric systems arising in finite element analysis, F. Shakib, T.J.R. Hughes and Z. Johan (1-3) 415-456
- Numerical solution of cavitation problems in lubrication, A. Bermudez and J. Durany (1-3) 457-466
- Finite element modelling of weak plasma turbulence, S. Succi, K. Appert, G. Radicati, Y. Robert and J. Vaclavik (1-3) 543-556

Fluid mechanics

- Un problème de fréquences propres en couplage fluide-structure, C. Conca, J. Planchard and M. Vanninathan (1-3) 27-37
- A high order staggered grid method for hyperbolic systems of conservation laws in one space dimension, R. Sanders and A. Weiser (1-3) 91-107

- A general formulation for nonlinear initialization of a numerical weather prediction model. Experiments with a shallow-water limited area model, R. Juванon du Vachat (1-3) 127-140
- A pseudospectral matrix element method for calculation of double diffusive layers near corners, H.-C. Ku, T.D. Taylor and R.S. Hirsh (1-3) 141-151
- Compressible viscous flow simulation by multigrid methods, F. Angrand and P. Leyland (1-3) 167-183
- Adaptive remeshing for transient problems, R. Löhner (1-3) 195-214
- Considerations for the development of grid schemes for hypersonic flows, D.D. Cline and J.J. Bertin (1-3) 283-297
- Application of the Boltzmann equation within the context of upper atmosphere vehicle aerodynamics, F. Golse (1-3) 299-316
- Iterative methods for the solution of Stokes equations, R. Aboulaich and M. Fortin (1-3) 317-324
- A combinatorial algorithm for the Euler equations of incompressible flows, Y. Brenier (1-3) 325-332
- Time accurate solutions of the incompressible and three-dimensional Navier-Stokes equations, H.A. Dwyer and S. Ibrani (1-3) 333-341
- A new finite element method for computing the flow inside rotating machinery, R. Camarero, A. Garon and D. Pelletier (1-3) 343-358
- An improved finite element iterative method for 3-dimensional fluid flow problems, M.P. Robichaud, P.A. Tanguy and M. Fortin (1-3) 359-368
- Finite volume methods for two-dimensional incompressible flows with complex boundaries, W. Rodi, S. Majumdar and B. Schöning (1-3) 369-392
- Calculation of three-dimensional laminar flows in tee-shaped junctions, A. Samagaio and N.S. Vlachos (1-3) 393-407
- Recent improvements in Galerkin and upwind Euler solvers and applications to 3-D transonic flow in aircraft design, V. Billey, A. Dervieux, L. Fezoui, J. Periaux, V. Selmin and B. Stoufflet (1-3) 409-414
- A multi-element group preconditioned GMRES algorithm for nonsymmetric systems arising in finite element analysis, F. Shakib, T.J.R. Hughes and Z. Johan (1-3) 415-456
- Numerical solution of cavitation problems in lubrication, A. Bermudez and J. Durany (1-3) 457-466
- Numerical modelling of flow assisted flame spread, C. Di Blasi, S. Crescitelli and G. Russo (1-3) 481-492
- Numerical simulation of semiconductor devices, F. Brezzi, L.D. Marini and P. Pietra (1-3) 493-514
- A new formulation for numerical simulation of electrophoresis separation processes, D.K. Ganjoo, W.D. Goodrich and T.E. Tezduyar (1-3) 515-530
- Etude en éléments finis de faisceaux de particules chargées, P. Ravier and J.-P. Penicaud (1-3) 531-542
- Finite element modelling of weak plasma turbulence, S. Succi, K. Appert, G. Radicati, Y. Robert and J. Vaclavik (1-3) 543-556

Incompressible and near incompressible media

- Non-conforming spectral element-finite element approximations for partial differential equations, C. Bègue, C. Bernardi, N. Debit, Y. Maday, G.E. Karniadakis, C. Mavriplis and A.T. Patera (1-3) 109-126
- Iterative methods for the solution of Stokes equations, R. Aboulaich and M. Fortin (1-3) 317-324
- A combinatorial algorithm for the Euler equations of incompressible flows, Y. Brenier (1-3) 325-332
- Time accurate solutions of the incompressible and three-dimensional Navier-Stokes equations, H.A. Dwyer and S. Ibrani (1-3) 333-341
- Finite volume methods for two-dimensional incompressible flows with complex boundaries, W. Rodi, S. Majumdar and B. Schonung (1-3) 369-392
- Calculation of three-dimensional laminar flows in tee-shaped junctions, A. Samagaio and N.S. Vlachos (1-3) 393-407

Heat and diffusion

- A pseudospectral matrix element method for calculation of double diffusive layers near corners, H.-C. Ku, T.D. Taylor and R.S. Hirsh (1-3) 141-151

Miscellaneous topics

- On Hartree and Hartree-Fock equations in atomic and nuclear physics, P.L. Lions (1-3) 53- 60
- On the design of an expert system guide for the use of scientific software, F. LaPorte (1-3) 241-250
- Single particle char combustion and gasification, G. Ballal, C.H. Li, R. Glowinski and N.R. Amundson (1-3) 467-479
- A new formulation for numerical simulation of electrophoresis separation processes, D.K. Ganjoo, W.D. Goodrich and T.E. Tezduyar (1-3) 515-530

Nonlinear mechanics

- A combinatorial algorithm for the Euler equations of incompressible flows, Y. Brenier (1-3) 325-332

Numerical solution procedures

- Definition d'une methodologie de demonstration numerique d'existence de solutions d'equations elliptiques semi-lineaires, A. Bamberger (1-3) 3- 10
- Numerical solution of Maxwell's equations in a conductive and polarizable medium, A. Bamberger, B. Cockburn, Y. Goldman, P. Joly and M. Kern (1-3) 11- 26

- Numerical analysis of reversion in elastic spherical caps equilibrium, G. Geymonat, M. Rosati and V. Valente (1-3) 39- 52
- Finite analytic numerical method for two-point boundary value problems of ordinary differential equations, C.J. Chen, M.Z. Sheikholeslami and R.B. Bhiladvala (1-3) 61- 76
- Recent developments in the numerical solution of differential/algebraic systems, L.R. Petzold (1-3) 77- 89
- A general formulation for nonlinear initialization of a numerical weather prediction model experiments with a shallow-water limited area model, R. Juvanon du Vachat (1-3) 127-140
- Development of a hierarchical and adaptive finite element software, G. Adjedj and D. Aubry (1-3) 153-165
- Compressible viscous flow simulation by multigrid methods, F. Angrand and P. Leyland (1-3) 167-183
- Multigrid domain decomposition methods for elliptic problems, Y.A. Kuznetsov (1-3) 185-193
- Internal design of the E3D inter-discipline environment, J.P. La Hargue and J.P. Mascarell (1-3) 227-240
- Iterative methods for the solution of Stokes equations, R. Aboulaich and M. Fortin (1-3) 317-324
- A combinatorial algorithm for the Euler equations of incompressible flows, Y. Brenier (1-3) 325-332
- An improved finite element iterative method for 3-dimensional fluid flow problems, M.P. Robichaud, P.A. Tanguy and M. Fortin (1-3) 359-368
- Finite volume methods for two-dimensional incompressible flows with complex boundaries, W. Rodi, S. Majumdar and B. Schöning (1-3) 369-392
- A multi-element group preconditioned GMRES algorithm for nonsymmetric systems arising in finite element analysis, F. Shakib, T.J.R. Hughes and Z. Johan (1-3) 415-456
- Numerical modelling of flow assisted flame spread, C. Di Blasi, S. Crescitelli and G. Russo (1-3) 485-496

Shells and plates

- Numerical analysis for eversion in elastic spherical caps equilibrium, G. Geymonat, M. Rosati and V. Valente (1-3) 39- 52
- Nonlinear thin shell finite element with six degrees of freedom per node, S. Jaamei, F. Frey and P. Jetteur (1-3) 251-266

Solutions of differential equations

- Definition d'une methodologie de demonstration numerique d'existence de solutions d'equations elliptiques semi-lineaires, A. Bamberger (1-3) 3- 10

Solutions of ordinary and partial differential equations

- Definition d'une methodologie de demonstration numerique d'existence de solutions d'equations elliptiques semi-lineaires, A. Bamberger (1-3) 3- 10
- On Hartree and Hartree-Fock equations in atomic and nuclear physics, P.L. Lions (1-3) 53- 60
